

TOPIC: How to Survive When your Phone's Battery is at 10%

TITLE of the speech: Keep calm and don't look at your phone

INTRODUCTION

Hi, today I will talk about how to Survive When your Phone's Battery is at 10%. One thing is clear: when your phone's battery is low, life becomes very very difficult.

BODY

The first thing to do is

The second thing you can try is

The third thing you can try is or you can

If that still doesn't work, you can start praying that no-one calls you until you have reached a phone charger and an electricity plug.

CONCLUSION

As I have demonstrated, life can become very difficult when your phone is about to die. So it's best to stop using your phone.... (and maybe buy a portable charger/power bank as soon as you can).

Thank you!
